TRAFFIC

ALERTS

*Helping You
Find an Easier Route*

Create your profile today and be informed of all conditions before you start your commute.

Avoid traffic jams, surprise detours, lane or road closures, and severe changes in road conditions by subscribing to the Hudson Transportation Management Association's **Free Traffic Alerts.**

Commuters can sign up for e-mail or texts alerts in real time about road closings, construction and alternate commuting routes. Visitors to the Hudson TMA website can also find out about traffic related police activity and the latest weather conditions.

You can also view all traffic alerts for the day, at any time, on our website: **www.hudsontma.org**

A Greener Commute
Keeping traffic moving means less idling and less pollution!

You may set-up one or more alert profiles that are specific to your individual travel plans. You might customize one profile for weekdays and a different one for weekends. You can also create different profiles if your morning commute is different from your evening commute.

You can re-customize and update your requests as often as you'd like by simply visiting our website!

To Create your Traffic Alert Profile Simply Register Online at
www.hudsontma.org

Your Complete Transportation Resource

For whatever type of trip you are taking, your Hudson TMA can assist in your trip planning. We are also your resource for carpooling, transit maps, fare and scheduling information.

Stop being late – avoid the frustration and stress.
